

Table 11: Crosswalk from College-Level OPEIDs to Super-OPEID Groups

Description: This table presents a crosswalk from the Department of Education’s OPEID (Office of Postsecondary Education Identification) college identifiers to the super_opeid identifiers used in our datasets. The table consists of a list of all colleges that children attend in our sample, indexed by OPEID. For each college, this table lists the corresponding super_opeid in our data.

Variable	Description
super_opeid	College or College Group ID in our Data: -1 = colleges with insufficient data 1-999 = school identifiable as part of a group of similar schools that cannot be separately identified >1000 = school individually identified, with super_opeid = OPEID
opeid	College OPEID from Department of Education
institution_name	College Name from Department of Education
superopeid_name	College or College Group name in our data. Where super_opeid>1000, superopeid_name is the same as institution_name.
multi	Indicator equal to 1 if there are multiple institutions included in a super_opeid. Equivalent to $0 < \text{super_opeid} < 1000$.
